## Quality Control Technician

### About the role:

Roads don't build themselves and neither does the quality behind them. As a Quality Control Technician at Stark Pavement Corporation, you'll be the person who makes sure every ton of asphalt and every lift of pavement meets the standard. You'll work across manufacturing facilities and active project sites throughout Wisconsin, performing hands-on testing and documentation that directly shapes the roads people rely on for decades.

### What you'll do

Provide quality testing for the company in a precise and expedient manner

Communicate findings clearly with project crews, supervisors, and external partners

Identify nonconforming materials and escalate issues through proper channels

Perform other related duties as needed.

### What we're looking for

Valid Driver's License and satisfactory driving record.

High School diploma or GED equivalent is preferred.

Capable of performing mathematical calculations.

Able to work in variable outdoor conditions, including heat, dust, and inclement weather

Reliable, detail-oriented, and willing to work early mornings, nights, and weekends when the project requires it.

### Preferred Skills

Previous field, laboratory, or scientific background.

Experience in heavy road and highway construction.

### Additional Notes

Must be able to lift and move objects up to 50-70lbs. Must have the ability to work various hours including nights, early mornings, and weekends as needed.

**Benefits:** Competitive wage, company paid Health Insurance, HRA, 401 K & profit sharing with company contribution. Growth opportunities working with and learning from experienced industry professionals.

How to apply to be considered for this position: Candidates can email resume or application to [careers@starkcorp.us](mailto:careers@starkcorp.us) or stop at our main office 12845 W Burleigh Rd, Brookfield WI 53005 to fill out an application.
